

What about background texture?

If you want to use this mockup with background texture that you see in our preview files, you must copy background image into the mockups file. To do that, follow these steps:

1. Go to "Background texture" folder (it's inside mockup folder).
2. Open in Photoshop texture file.
3. Select all and copy the selection (CTRL+A, CTRL+C).
4. Open our mockup PSD file (anyone you want).
5. Expand "Background" group.
6. Double click on "Background texture" smart object layer.
7. Paste the image, that you copied before (CTRL+V).
8. Save it. (CTRL+S).

That's it!

Sorry for that strange method. But thanks to this, our mockup file is much much smaller. Don't believe us? Try it for yourself. :)
